**The Product Lifecycle**

Take control of your product development with BOMControl.

BOMControl, a cloud-based solution for bill of materials (BOM) and change management, bridges the gap between design, engineering and manufacturing with a controlled, centralized way to manage changes to product data. With up-to-the-minute accurate product information that can be accessed anytime, and from anywhere in the world, BOMControl reduces scrap, speeds time to market and makes it easy to include strategic partners, suppliers and contract manufacturers in the product development process.

**BUSINESS BENEFITS**

**Operations and Manufacturing**
Ensure on-time delivery and meet your cost targets. BOMControl gives you visibility into your product data—from the first BOM to the final change order.

**Engineering**
Get your designs out the door quickly and accurately—the first time. BOMControl provides a controlled environment to share published product information and control the engineering change process.

**Document Control**
Gain control of your documents, part numbers and change processes. BOMControl provides a secure central repository to manage your key product information and change processes.

**Purchasing and Supply Chain**
Make better purchasing decisions faster and earlier. BOMControl gives you the visibility you need into product releases—and lets you securely share information with your suppliers and CMs.

**Quality**
Capture quality documentation and enforce process controls within your company and across the supply chain. BOMControl helps you track part, product and process compliance with reports and audit trails.

**Contract Manufacturers**
Build the right products for your customers. BOMControl ensures that you are always building to the right revision by replacing FTP, faxes and emailed spreadsheets with a secure system available 24x7 from anywhere in the world.

**ABOUT ARENA**
For over a decade, Arena has been redefining PLM with a suite of cloud applications that enable engineering, manufacturing and their extended supply chains to work better together—from first prototype to full-scale production. Arena helps innovative manufacturers bring better products to market faster with cloud PLM offerings that speed prototyping, reduce scrap and help manufacturers collaborate on product changes with strategic partners worldwide.
