

Arena-NetSuite Integration

Ensure NetSuite is always up-to-date with the latest product information from Arena BOMControl.

The system of record for your product.

- ✓ Bill of materials (BOM) management
- ✓ Change management (ECR, ECO)
- ✓ Document management
- ✓ Compliance management

The system of record for your financials.

- ✓ Purchasing
- ✓ Inventory management
- ✓ Order management
- ✓ Accounting

Make the right purchasing, inventory and order management decisions in NetSuite by always having the latest product information from BOMControl.

Features	Benefits
Automated Integration	Eliminate the need for manual entry from BOMControl into NetSuite
Product/SKU Updates	Automatically update NetSuite Items/SKUs when the corresponding Items are changed via ECO in BOMControl
New Item Creation	Automatically create new NetSuite Items/SKUs when new items are released in BOMControl
Custom Mapping from BOMControl to NetSuite	Map the integration directly to your business processes
Configurable Update Frequency	Customize how often information is pushed from BOMControl to NetSuite
Secure Data Transmission	Don't worry—your data remains encrypted in transit between secure systems
Live Monitoring	Gain instant visibility into the live status of the integration from the BOMControl dashboard
Email Notification	Stay up-to-date with immediate notification of changes and errors via email

WHAT IT DOES

The Arena-NetSuite Integration automates the process of transferring current product data from BOMControl to NetSuite, avoiding manual entry errors and ensuring that NetSuite is always up-to-date.

HOW IT WORKS

- The integration is triggered when Item-related information such as vendor or component data is changed via engineering change order (ECO) in BOMControl.
- The NetSuite Adapter receives and processes the changes.
- Existing Items/SKUs are updated or new Items/SKUs are created in NetSuite.
- The Adapter logs the updates and any exceptions.
- The administrator is notified via email of any changes.

“BOMControl gives us the ability to manage a tremendous amount of product information, collaborate with our key suppliers, and comply with industry standards—all with extreme confidence—as we bring our game changing ZENN vehicles to the market.”

Michael Bergeron
Vice President, Engineering
Zenn Motor Company

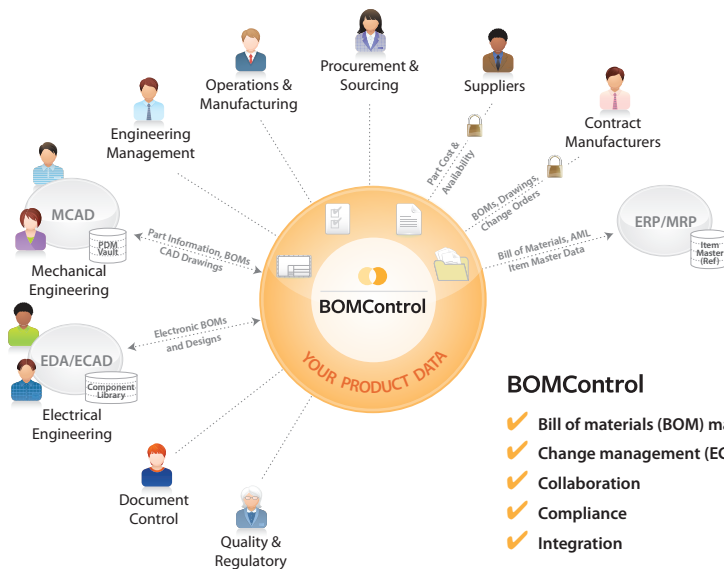

ABOUT ARENA

For over a decade, Arena has been redefining PLM with a suite of cloud applications that enable engineering, manufacturing and their extended supply chains to work better together—from first prototype to full-scale production. Arena helps innovative manufacturers bring better products to market faster with cloud PLM offerings that speed prototyping, reduce scrap and help manufacturers collaborate on product changes with strategic partners across the globe.

Arena BOMControl Product Overview

BOMControl provides a centralized system of record where manufacturers can control revisions, manage the engineering change process and selectively share accurate, up-to-date bills of materials (BOMs) with partners, suppliers and contract manufacturers.

BOMControl

- ✓ Bill of materials (BOM) management
- ✓ Change management (ECR and ECO)
- ✓ Collaboration
- ✓ Compliance
- ✓ Integration

Ensure on-time product delivery and meet your cost targets.

BOMControl gives you complete visibility into, and control of, your product data—from the first BOM to the final sign-off.

Matt McAmmond

Director of Manufacturing
Pixel Velocity

ARENA CUSTOMERS INCLUDE

and hundreds more.

Features	Benefits
✓ BOM Management	Centralize your bills of materials (BOMs) to ensure that all stakeholders are collaborating around the latest version of your product data
✓ Change Management	Accelerate change requests and change orders (ECRs & ECOs) and automate approval routings to process your changes faster
✓ File Management	Upload and store files in BOMControl to ensure complete and accurate revision control while keeping part information up-to-date
✓ Collaboration	Grant secure access to your suppliers and contract manufacturers to enable real-time collaboration and ensure that the correct design is always built
✓ Compliance	Ensure part, product and process compliance (such as RoHS, FDA, UL, CE and ISO9000) with compliance reports and audit trails
✓ Integration	Integrate to CAD, PDM, EDA, ERP and MRP systems for accurate data transfer and elimination of error-prone, manual double-entry
✓ Software as a Service (SaaS)	Don't worry about expensive servers or IT support—BOMControl is cloud-based so all hardware, software and upgrades are included in your subscription
✓ Support	Get help when you need it with included phone and email support—you can provide feedback or get help from every page in the app
✓ Dashboard and Reports	Stay up-to-date on the latest status of compliance, projects and change orders with customizable reports and your personalized dashboard
